# LORENZO MIGUEL BO, CPDA

**CERTIFIED PROFESSIONAL DATA ANALYST | EXCEL • SQL • POWER BI**
lorenzomiguelbo.github.io | linkedin.com/in/lorenzobo | bolorenzomiguel@gmail.com | +63 976 129 8676 | Manila, Philippines

## PROFESSIONAL SUMMARY

Data analyst with a B.S. in Mathematics and experience across insurance, billing, and operations. Skilled in SQL, advanced Excel (VBA, Power Query, Power Pivot, DAX), and Power BI for reporting. Automated 9 recurring reports, cutting the largest from 9 hours to 4. Builds executive-ready dashboards that turn complex data into clear, actionable insights.

## EXPERIENCE

**OCTOBER 2026 - PRESENT**

### COMMERCIAL OPERATIONS & INTELLIGENCE OFFICER, SOMMELIER SELECTIONS

- Oversee commercial data integrity, CRM governance, and reporting processes across business units, ensuring accurate, consistent, and reliable business information.
- Consolidate, validate, and analyze data from Odoo ERP/CRM and other business sources to support management reporting, KPI monitoring, and commercial decision-making.
- Develop and improve recurring reports, dashboards, and data analysis processes to reduce manual work and improve reporting efficiency.
- Manage customer master data, account hierarchies, segmentation, sales attribution, and CRM data-entry standards to maintain data quality and operational consistency.
- Identify reporting gaps, data discrepancies, and process improvement opportunities while establishing standardized procedures and data governance controls.

**AUGUST 2025 – OCTOBER 2026**

### SERVICE DELIVERY ANALYST, RESOURCE PRO (FORMERLY WITH MICROSOURCING PHILIPPINES INC.)

- Develop and maintain client-facing reports, charts, and dashboards, transforming operational and policy data into structured information used by senior stakeholders, including Presidents, Vice Presidents, and Chief Underwriters.
- Automated and optimized 9 recurring weekly and monthly reports using Excel VBA, Power Query, Power Pivot, DAX, and advanced Excel formulas, reducing report handling time by up to 55%; the largest reporting process was reduced from approximately 9 hours to 4 hours per cycle.
- Re-engineered reporting procedures alongside automation initiatives, redesigning data preparation, transformation, calculation, and reporting workflows to reduce repetitive manual work and improve process consistency.
- Create and execute SQL-based reports and templates using AIM Report Manager, extracting and organizing insurance data to support client reporting and operational requirements.
- Performed QA and data validation, and wrote SOPs and training materials to help the team adopt improved processes.

**OCTOBER 2022 – FEBRUARY 2025**

### CUSTOMER SERVICE REPRESENTATIVE, DME SERVICE SOLUTIONS

- Collected and verified patient information within the New Patient Intake Department, ensuring accurate documentation and adherence to insurance requirements.
- Managed account creation, documentation verification, and order fulfillment processes while coordinating information across the patient intake workflow.
- Answered product inquiries and resolved customer feedback and complaints.

**SEPTEMBER 2021 – JULY 2022**

### CUSTOMER SERVICE SPECIALIST, MOSCORD PTE LTD

- Transformed product and transaction data from multiple customer formats into standardized structures for integration into marketplace and transaction systems.
- Performed data cleaning, validation, mapping, and standardization, including verification of customer company information, to improve data accuracy and consistency across system records.
- Processed and maintained transactional data throughout the order lifecycle, coordinating with clients and internal teams to resolve data discrepancies and processing issues.

**OCTOBER 2019 – JULY 2021**

**BILLING SPECIALIST,** PROVIEW GLOBAL ADMINISTRATION, INC

- Performed premium billing reconciliation, data validation, and audits by processing carrier invoices, reconciling client billing records, and investigating discrepancies in premium payments across reporting periods.
- Applied advanced Excel formulas and reconciliation techniques to analyze billing data, consolidate invoice statements, verify payment accuracy, and resolve data inconsistencies in coordination with client counterparts.
- Served as temporary Officer-in-Charge of the Premium Billing Workstream (February–April 2021), preparing weekly utilization and end-of-day client reports, presenting operational updates during client meetings, monitoring deliverables, and training new hires.

**JULY 2018 – AUGUST 2019**

**CUSTOMER SERVICE REPRESENTATIVE,** ALORICA PHILIPPINES

- Assisted customers by providing helpful information, resolving customer inquiries and billing issues, setting clear expectations on outcomes, and responding to complaints.

# PROJECTS

- **Commercial Insurance Portfolio Analytics Dashboard | Excel, Power Pivot, VBA, Power BI, DAX**
  - Built a four-page dashboard (Overview, Loss Ratio, Hit Ratio, Retention) on a star schema of 6 fact tables and 5 dimensions, covering Package and Workers' Compensation lines with 2025 results benchmarked against 2024.
  - Wrote DAX insight cards with sample-size guards and thresholds calibrated to the actual data distribution, and fixed a retention double-count by unioning accounts in Power Query and deduplicating with DISTINCTCOUNT.
  - Delivered the analysis in both Excel (41 pivot tables, VBA-driven narratives) and Power BI. Built on an anonymized dataset.
- **Philippine CPI & Inflation Analytics Platform | SQL (SQLite), Python, Power BI, DAX**
  - Designed a SQLite star schema (3 dimensions, 5 fact tables) from official PSA files, cleaning encoding errors, duplicate records, and inconsistent date formats, then connected it to Power BI via ODBC.
  - Built a five-page report (Overview, Commodity, Regional, Inflation Drivers, Statistical Analysis) with DAX MoM and YoY measures.
  - Modeled oil price pass-through with OLS regression in Python (Brent crude lagged one month, national $R^2 = 0.40$), finding the strongest sensitivity in transport and in housing, electricity, and gas.
